Cyber Security for Critical Client Protection

Every world-class MSP should be able to provide this next level of security to clients, and now you can.

As a trusted LabTech Software© partner, you know what it takes to neutralize security threats for your clients. Yet nothing is foolproof. They are still vulnerable even with Firewalls and Antimalware. Now you can stand out as the leading provider of critical client protection.

Close security holes left open to cyber security vulnerabilities like data thelft, lost laptops, viruses and malware. Build a **Third Wall™** *to give clients the protection they need and deserve.*

Next-Level Cyber Security

Third Wall™ directly plugs in to your indispensable LabTech© Software to greatly expand the security services you provide. This innovative, highly-affordable plug-in deploys powerfull cyber security policies across any or all of your clients, and allows individual exceptions to be made to any policy on any computer.

Tighten Client Security Monitoring with One Click

With **Third Wall™** and its select automated security services, you can:

- Protect your clients from threats better than ever.

- Set yourself apart from other MSPs that simply don't have the same protection to offer.

- Reduce the number and severity of incidents that you have to clean up for your clients, lessening your workload.

Third Wall for Critical Cyber Security

"**Third Wall** protects the environment, hardens every endpoint, and makes it much harder for cyber threats to critically damage a business."

Dr. Ken Knapp, CISSP
CEO, CyberSecure Advising.

ANTIVIRUS/ANTIMALWARE

Your antivirus/antimalware from LabTech© is your second wall, blocking hackers constantly working to infect your computers.

FIREWALL

Your firewall, the critical first wall, is often taken for granted. Keep it working and monitored by Labtech©.

Cyber Security THIRD WALL

The **Third Wall™** fills the gaping holes left in your cyber security. It's the next level to managing the most secure environment.

Third Wall.

The Next Level in Critical Cyber Security Protection.

New Capability

Offer an affordable, new suite of security services that gives you a commanding low-price tool for protecting your clients, limiting end-user access that can and does cause major issues, disabling legacy protocols that are open doors for hackers and viruses, and improving password protection. You also only pay for what you actually use.

More Time

Lessen your workload by dealing with fewer client cyber security breaches and incidents, and by employing instant-response tools to manage critical breaches, allowing you to focus more on delivering other complementary IT services that add greater value and more revenue.

Easy to Use

Right on your LabTech© Control Center, effortlessly deploy potent security policies with just a click, assesing more than 35 different policies and rapid-response buttons to assign those policies across any LabTech© Location, and easily make exceptions to any computer.

Effective Security

Deliver greater control over security policies that remain strong and resilient, and can only be changed by your technician, with a LabTech© monitor initiated at deployment to fully safeguard your clients.
